Basic computer maintenance and repair can be done easily at home. Some common problems are random error messages, computer being too slow, blue screen, frozen screen, and automatic rebooting. It's a common misconception that repairing a computer requires a lot of expertise. In actuality, any common person can service simple computer problems.

~~Repair Manuals for Every Thing — iFixit~~

The general rule of thumb is that you shouldn't spend more than 25% to 50% of the computer's original value on a repair. That means if your computer cost you \$2,000, any repair over \$500 to \$1,000 is probably not worth it — you're better off replacing the computer. Is a 10-year-old computer worth fixing?
