This award has been established in honour of Glyn O. Phillips who initiated the Gums and
Stabilisers for the Food Industry series of conferences. The purpose of the award is to
recognise the outstanding achievements by early-career scientists in Academia or Industry in
any aspect of the study and application of hydrocolloids, particularly, but not exclusively,
those with established or potential uses in food.

The 20th Gums & Stabilisers for the Food Industry ...

Gums and Stabilisers for the Food Industry is a biennial conference (see the official website)
held in Wrexham, North Wales, since 1981, on the application of hydrocolloids (
polysaccharides and proteins) in the food industry. Presentations at the conference cover
recent advances in the structure, function and applications of gums and stabilisers, how
these materials are used in industrial processes, and also educational material on the subject.

Gums and Stabilisers for the Food Industry - Wikipedia

The science and technology of hydrocolloids used in food and related systems has seen
many new developments and advances over recent years. This book presents the latest

research from leading experts in the field. Some of the topics covered within this book include biochemical characterisation, the use of antibodies, immunostaining and enzyme hydrolysis, chemical and physicochemical ...

Gums And Stabilisers For The Food Industry 16 Rsc Special ...

Guar gum is widely used as a stabilizer and thickening agent with a typical viscosity of 3,500 cps at 1% gum level. A specialty product such as hydrolyzed guar gum was prepared by breaking down some of the glycosidic linkages, with an enzyme, galactomannanase.

Gums and Stabilisers for the Food Industry 10 | ScienceDirect

Gums and Stabilisers for the Food Industry 17 captures the latest research findings of leading scientists which were presented at the Gums and Stabilisers for the Food Industry Conference. Covering a wide range of topics, including; functional properties of proteins, alternative protein surces, low moisture foods, value added co-products from biorefining and bioactive polysaccharides.

Gums and Stabilisers for the Food Industry 17 (RSC Publishing)

This work contains the proceedings of a conference on gums and stabilisers for the food industry. Contributions are concerned with the structure-function relationships of various polysaccharides and protein systems, as well as progress on mixed biopolymer systems. Details. ISBN. 978-1-85573-789-1. Language. English. Published.

Gums and Stabilisers for the Food Industry 9 | ScienceDirect

Gums and Stabilisers for the Food Industry 11. P.A. Williams, G.O. Phillips. The breadth and depth of knowledge of gums and stabilisers has increased tremendously over the last two decades, with researchers in industry and academia collaborating to accelerate the growth. Gums and Stabilisers for the Food Industry 11 presents the latest research in the field of hydrocolloids used in food.

Gums And Stabilisers For The Food Industry 11 Rsc Special ...

The stabilizers are a group of compounds, usually polysaccharide food gums, that are responsible for adding viscosity to the mix and the unfrozen phase of the ice cream. This results in many functional benefits, listed below, and also extends the shelf life by limiting ice recrystallization during storage. Without the stabilizers, the ice cream would become coarse and icy very quickly due to the migration of free water and the growth of existing ice crystals.

Gums And Stabilisers For The Food Industry 12 Special ...

Certain foods utilise gum stabilisers, while others use starch or phosphates. For instance, gum and starch stabilisers are frequently used in salad dressings, frozen desserts, snack

foods, cereal products, pudding mixes, jams, jellies and beverages. The food additives used also differ according to food processing method used for different foods.
