This handbook was part-funded by the Department of the Environment, Transport and the Regions under research contract number 39/03/272 cc 862. This handbook was written by the Centre for Window and Cladding Technology (CWCT) as part of its training programme to improve the standard of curtain wall installation.

Standard for Curtain Walling Guide to Good Practice for Facades Test Methods for Curtain Walling The aim of these documents is to assist those who specify, design, manufacture or install curtain walling. They set performance criteria in a rational framework and provide a means for the consistent specification of curtain wall performance.

CWCT0000019/1. Fire performance of curtain walls and rainscreens of limited combustibility or Class 0 using definitions given in AD B. Materials may also be classified as Class 1, 2, 3 or 4 in accordance with BS 476 Parts 6 and 7. Equivalent European classifications are also used. The Scottish Technical Handbook does not differentiate between non-combustible materials and materials of limited combustibility and uses the term non-combustible to include materials classed as being of limited...

The new CWCT 'Standard for systemised building envelopes' is applicable to: Curtain walling; Walls with ventilated rainscreens; Overhead glazing. Previously these forms of construction were covered by separate CWCT Standards. The Standard covers: Weathertightness; Loading and movement; Thermal and moisture performance; Acoustics; Fire performance

CWCT has implemented a system of installer training leading to a CWCT 'Installers card'. It is equally important that architects, engineers, main contractors and others with a supervisory role on site are trained and capable of inspecting the work, again CWCT have implemented suitable training programmes.
