For many years Harley-Davidson carbureted models were built with a V.O.E.S. These letters stand for Vacuum Operated Electric Switch. This Harley VOES switch has a very important function on a Harley-Davidson. It senses vacuum behind the butterfly of the carburetor and advances or retards the ignition timing accordingly.

I've got a problem. I have a 1997 Harley Davidson Sportster 1200 Custom and hose on the very bottom of my carburetor fell off from someplace. Before I noticed the problem, my choke wouldn't make a difference if the bike the bike was running too lean and too rich. As soon as it warmed up, the idle would be way high and it wouldn't adjust with the choke.
