Cervicogenic headache (CGH) is a chronic headache that arises from the atlanto-occipital and upper cervical joints and perceived in one or more regions of the head and/or face. A cervicogenic headache is a common cause of a chronic headache that is often misdiagnosed.

### Cervicogenic Headache - Physiopedia

A reduction in the normal curve in the cervical spine, which can be seen in people with Forward Head Posture, was directly found to have an increase in headaches as well as an increase in weakness of the neck. Our posture is a direct outcome of our daily lifestyle or habits.

### **Chronic Migraines: Your headaches are being caused by your ...**

Tension headaches, causing pain at the base of the neck, are the most common type of headache by a wide margin. The area between the upper cervical spine and the base of your skull is termed the sub-occipital region. This area is rich in nerve fibers, joints and small muscles -- all of which are capable of generating pain.

### **Causes of a Headache at the Base of the Neck | Healthfully**

This is called cervical spondylosis. Symptoms include: neck and shoulder pain or stiffness – that comes and goes; headaches that often start at the back of the neck; Exercise can ease cervical spondylosis symptoms. Neck pain can be helped with exercise and by improving your posture. A pharmacist can help with cervical spondylosis

### **Cervical spondylosis - NHS**

In summary, cervicogenic headaches are a particular subset of headaches that are caused by dysfunction in the upper cervical spine. Dysfunctional segments can be made functional again with manual therapy techniques such as soft tissue mobilizations or joint mobilizations and manipulation. Manual therapy should always be followed up with exercise.

How cervical spine instability pinches on arteries and disrupts, impedes, and retards blood flow into the brain. This is one of the great challenges that face cervical spine or cervical neck instability patients. The understanding of what treatment may help them the best and the controversies and confusions that surrounds these treatments.

### **How cervical spine instability disrupts blood flow into ...**

A spinal headache is a very intense headache. It occurs when cerebrospinal fluid (spinal fluid that surrounds and cushions the brain) leaks out of the meninges (tissue that surrounds the brain and spinal cord). This leakage reduces the amount of fluid around the brain.

### **Spinal Headaches: Causes, Symptoms, Treatment & Outcome**

To help correct your standing posture, imagine a string attached to the top of your head pulling you upwards. The idea is to keep your body in perfect alignment, maintaining the spine's natural curvature, with your neck straight and shoulders parallel with the hips: keep your shoulders back and relaxed pull in your abdomen

### **Common posture mistakes and fixes - NHS**

A cervical headache, or cervicogenic headache, is a type of long-term or chronic headache due to structural issues with parts of the cervical spine, including the vertebrae, disc, muscle, or spinal...

### **Headache, dizziness, fatigue, and neck pain: Causes and ...**

Cervicogenic headache (CGH) is defined as headache symptoms originating from the cervical spine. Cervical dysfunction from abnormal posture has been proposed to aggravate or cause CGH, but there are conflicting reports as to whether there is an association between posture and CGH.

### **Investigation of Cervical Spinal Posture in Cervicogenic ...**

Patients with cervicogenic headache will often have altered neck posture or restricted cervical range of motion. 16 The head pain can be triggered or reproduced by active neck movement, passive neck positioning especially in extension or extension with rotation toward the side of pain, or on applying digital pressure to the involved facet regions or over the ipsilateral greater occipital nerve.
