Read Book Honda Transmission Identification Guide

Honda has long built nearly all of its own automobile transmissions, unlike many other automobile manufacturers which often source transmissions from external sources. The most notable exception was in 2014, when Honda decided to forgo an in-house designed transmission and chose the ZF 9HP transmission for their Acura TLX V6 model, later extending the offering of the ZF transmission to the ...

Transmission Lookup ...

These Honda transmissions utilized traditional, individual gears on parallel axes [like manual transmissions do] with each gear ratio engaged by a different hydraulic clutch pack. These Honda transmissions preserve engine braking by doing away with a sprag between the first and second gears, relying instead on pressure circuits to change gears.
