Human Resources - SAP
SAP HR Module | SAP Human Resource Overview. Summary. The aim of the Human Resources component is to enable companies to process employee related data according to business requirements in an effective structure. The Human Resources module uses a system of data grouped together called infotypes. Infotypes mirror a quantity of connected data records; infotypes are identifiable through a four character numerical string [e.g. infotype Addresses (0006)] and a complete listing is included.
