There are many reference books and sources of information on dredging techniques and dredging equipment but very little has been written solely on planning, design and construction of land reclamation using hydraulic fill. This manual, a first of its kind, is an ideal reference for all involved in the development of such infrastructure projects.

Hydraulic fill manual - IADC Dredging

Hydraulic fill is material that is dredged from a borrow area or other area and placed at a site to raise the level of the land or build new land. Hydraulic fill can be won from designated borrow areas or from riverbeds, seabeds or oceans. The quality and quantity of this fill is of the utmost importance in planning a dredging project.
