Data Compression In February 2019, an organization founded by the world's major space industries, the Consultative Committee for Space Data Standards (CCSDS), approved a standard for both lossless and near-lossless compression of multispectral and hyperspectral images (CCSDS 123).

Abstract: This paper evaluates lossy vector quantization-based hyperspectral data compression algorithms, using red-edge indices as end-products. Three compact airborne spectrographic imager (CASI) data sets and one airborne visible/infrared imaging spectrometer (AVIRIS) data set from vegetated ...

Hyperspectral Data Compression provides a survey of recent results in the field of compression of remote sensed 3D data, with a particular interest in hyperspectral imagery. Chapter 1 addresses compression architecture, and reviews and compares compression methods.
