IEEE-39-bus-power-system. This project contains a full-replica MATLAB/Simulink dynamic model of the IEEE 39-bus power system, including dynamic models of conventional generation and dynamic load profiles. The model was developed in the Distributed Electrical System Laboratory of École Polytechnique Fédérale de Lausanne (EPFL), Switzerland.

ieee 33 bus system. This paper presents solution of economic dispatch problem via a particle swarm optimization algorithm (PSO). The objective is to minimize the total generation fuel cost and keep the power flows within the security limits.

ieee 33 bus MATLAB simulink - Free Open Source Codes ...

The proposed method is programmed in MATLAB domain and the effectiveness of this algorithm for cost minimization and loss reduction by placing capacitors optimally is tested on 34-bus and 85-bus radial distribution test systems. The results obtained are explained in the following sections.

Optimal siting of capacitors in radial distribution ...

IEEE power systems are widely used (e.g. IEEE 118-bus) in papers and in books, but I do not know of any official IEEE website or publication that contains this data.
