The Industrial Ventilation Design Guidebook addresses the design of air technology systems for the control of contaminants in industrial workplaces such as factories and manufacturing plants. It covers the basic theories and science behind the technical solutions for industrial air technology and includes publication of new fundamental research and design equations contributed by more than 40 engineers and scientists from over 18 countries.

Bench Grinder Exhaust Ventilation ¶ However there are losses thru the grinder hood entry $SP_2 = - (VP_2 + h_e)$ where h_e is the energy loss of the hood entry ¶ Static pressure (SP) must decrease due to acceleration of air up to the duct velocity ¶ F_h is defined as the energy loss factor (for that hood design) ¶ Energy losses will be measured as a function of the velocity pressure in ...
