Infect Control Hosp Epidemiol Journal

Infection Control & Hospital Epidemiology publishes scientifically authoritative, clinically applicable, peer-reviewed research on control and evaluation of the transmission of pathogens in healthcare institutions and on the use of epidemiological principles and methods to evaluate and improve the delivery of care. Major topics covered include infection control practices, surveillance, antimicrobial stewardship, cost-benefit analyses, resource use, occupational health, and regulatory issues.

## Infection Control & Hospital Epidemiology | Cambridge Core

The SHEA journal, Infection Control & Hospital Epidemiology (ICHE), is published monthly by Cambridge University Press. It provides original, peer-reviewed scientific articles for professionals in epidemiology or infection prevention and control programs in hospitals and healthcare facilities.

ICHE Journal Infection Control and Hospital Epidemiology Published monthly by Cambridge University Press, ICHE provides original, peer-reviewed scientific articles for the professional in epidemiology or infectious prevention and control programs in hospitals and healthcare facilities. A subscription to ICHE is included with SHEA membership dues.

### Home - Society for Healthcare Epidemiology of America

The Journal of Hospital Infection is the editorially independent scientific publication of the Healthcare Infection Society. The aim of the Journal is to publish high quality research and information relating to infection prevention and control that is relevant to an international audience. The Journal welcomes submissions that relate to all aspects of infection prevention and control in healthcare settings. This includes submissions that:

### Journal of Hospital Infection - Elsevier

The purpose of this investigation was to study risk factors for Clostridium difficile infection (CDI) in an endemic setting. In a 34-month prospective case-control study, we compared the risk factors and clinical characteristics of all consecutively diagnosed hospitalised CDI patients (n = 93) with those of patients without diarrhoea (n = 76) and patients with non-CDI diarrhoea (n = 64).
