how a product acts and functions work for users. It's akin to a blueprint for digital products, and it displays pages, content, interactions, and behaviors for the entire product. What architecture is all about

The UX Process for Information

Information architecture isn't really visible to the visitors, but it presents a backbone of the website, and can be visually presented in spreadsheets and different types of diagrams and is then called a sitemap. ... You can use it to

create charts, agile boards, customer journeys, personas, empathy blueprints, mind maps, organizational ...

A Beginner's Guide To Information Architecture in UX (2020)

Information architecture (IA) is the structural design

of shared information environments; the art and science of organizing and labelling websites, intranets, online communities and software to support usability and findability; and an emerging community of practice focused on bringing principles of design, architecture

and information science to the digital landscape.

Information architecture - Wikipedia

IA is a blueprint of the design structure which can be generated into wireframes and sitemaps of the project. UX designers

use them as the basic materials so that they could plan navigation system. UX design means much more than content structuring.

Information Architecture: Blueprints for the Web Amazon ...

A blueprint is a reproduction of a technical drawing or engineering drawing using a contact print process on light-sensitive sheets. Introduced by Sir

John Herschel in 1842, the process allowed rapid and accurate production of an unlimited number of copies. It was widely used for over a century for the reproduction of specification drawings used in construction and industry. The blueprint process was

characterized by white lines on a blue background, a negative of the original. The process was characterized by white lines on a blue background, a negative of the original. The process was n
