Then, you will win the tournament if you win against the 2nd player (probability p 2) and also you win against at least one of the two other players [probability p 1 + (1 ? p 1)p 3 = p 1 + p 3 ? p 1p 3]. Thus, the probability of winning the tournament is p 2(p 1 + p 3 ? p 1p 3). The order (1,2,3) is optimal if and only if the above probability is no less than the
