This branch of linguistics is concerned with how phonemes and their allophones operate in different phonological systems. Throughout history, the study of phonology has witnessed a paradigm shift with the introduction of distinctive features as the smallest units of phonological analysis instead of phonemes.

Module aims. This module introduces students to the phonetic and phonological analysis of language, starting with phonetics and moving on to phonology. The phonetics part covers the basics of articulatory and impressionistic phonetics. The phonology part covers the position of phonology within the human linguistic system, recurrent phonological phenomena in the world's languages and the phonological notation most commonly used by linguists.
