The impact factor (IF) or journal impact factor (JIF) of an academic journal is a scientometric index calculated by Clarivate that reflects the yearly average number of citations that articles published in the last two years in a given journal received. It is frequently used as a proxy for the relative importance of a journal within its field; journals with higher impact factors are often ...

~~Impact factor - Wikipedia~~
2020 Release of Journal Citation Reports. The 2020 Edition of the Journal Citation Reports® (JCR) published by Clarivate Analytics provides a combination of impact and influence metrics from 2019 Web of Science source data. This measure provides a ratio of citations to a journal in a given year to the citable items in the prior two years.

~~Impact Factor Rankings - Annual Reviews~~
The Journal Impact Factor is the average number of citations received in the last year to articles published in the previous two years. It is measured each year by the Web of Science Group and reported in the Journal Citation Reports (JCR). The JCR analysis released in 2020 is based on citations in 2019 to articles published in 2017 and 2018.

So the journal's first 2010 impact factor (for which I take a modicum of credit ;-)) is a whopping... 4.694 (3 rd among all 'conservation' journals). Well done to all and sundry who have edited and published in the journal. My best wishes to the team that has to deal with the inevitable rush of submissions this will likely bring!

Membranes (ISSN 2077-0375; CODEN: MBSEB6) (ISSN 2077-0375) is an international, peer-reviewed, open access journal, covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries.

~~Membranes | An Open Access Journal from MDPI~~
The journal's impact factor is calculated yearly and refers to the average number of citations received per paper published in that journal during the two preceding years. This means that if in 2015, the journal Creativity and Innovation Management had an impact factor of 1.143, articles published in this journal in 2013 and 2014 were cited ...

~~Journal Impact Factor Explained - Thesis Writing~~ ...
The impact factor for scientific journals is released around June every year by Thomson Reuters, the guru of scientific publication metrics. All science journal editors wait for the new impact factor every year and if you are a publishing scientist you might have seen emails from at least some of the journals bragging on the improved impact factor.

~~Journal Impact Factor ScienceDebate.com~~
An aggregate journal impact factor of 1.0 implies that the articles in the subject category published in recent two years have been cited once on an average. The median Impact factor is the median value of all journals impact factors in the subject category. The journal impact factor extenuates the significance of absolute citation frequencies.

~~Open Access Journals Impact Factor | Scientific Journals~~ ...
The Impact Factor helps evaluate a journal's impact compared to others in the same field by measuring the frequency with which recent articles in a journal have been cited in a particular year: the 2011 Impact Factor takes into account citations in 2011 to papers published in 2009 and 2010.

~~Elsevier Announces 2011 Journal Impact Factor Highlights~~
The Journal Impact Factor was developed in the 1950s and is a widely-used measure of the influence of journals. Impact Factor is calculated and published annually by Thomson-Reuters (owner of Web of Science) in the Journal Citation Reports database.It covers over 8,200 science journals and 2,900 social science journals.
