This guide is for a set of Keihin carburettors from a Honda CBR250RR MC22. However, it could be useful for other models that use Keihin carburettors. When disassembling your carbs, take as many photos as necessary. Note that most parts books and manuals do not show the details of the parts and assembly of the carburettors when they are separated. Most of them will show all of the internal jets etc, but very little of the external fittings that are between the carbs, such as springs and ...

~~PLEASE NOTE: This is a PRELIMINARY copy of the Carburetor ...~~

This is especially important on Keihin PJ series carbs in that the idle adjust knob (#4 in illus.) cannot be completely closed. Such an adjustment will result in a sluggish response off idle. Air/gasoline adjustment screw: the carburetor pictured in the exploded view uses an air adjustment screw (#5 in illus.) in that it is located upstream of the throttle valve (slide) and meters air; turning it counter-clockwise leans the mixture off idle.

All Keihin carburetors are pre-jetted for bolt-on operation. Carburetors are jetted using stock motorcycles and watercrafts. Any major engine modifications like higher compression pistons and racing exhaust systems may require minor jetting adjustments. The following is a guideline for jetting Keihin carburetors.

~~Jetting Tuning - pjmotorsports~~

Keihin Carburetor Jetting AIR SCREW: The air screw is a small (5mm in diameter) slotted brass adjustment screw located on the inlet side (air filter side) of the carburetor.

~~Shiny Red Tuning - Keihin Carburetor Jetting~~

Straight diameter section - In Keihin carburetors, either the last two digits or last letter denotes the diameter of the needle. The higher the last two digits, the leaner the needle and the lower the letter, the richer the needle. By going to a thinner needle, there is a
