for Teaching Excellence, Carnegie Mellon University The following list presents the basic principles and teaching strategies that underlie effective learning. These principles are distilled from research from a variety in disciplines.

## Research-based Principles of Learning & Teaching ...

‘ Teaching can be research-based in that sense that the curriculum is largely designed around inquiry-based activities, rather than on the acquisition of subject content; the experiences of staff in processes of inquiry are highly integrated into the student learning activities; the division of roles between teacher and student is minimised; the scope for two-way interactions between research and teaching is deliberately

features of undergraduate research . Enquiry-based learning in its widest sense can be seen as an umbrella term, ‘ covering a range of approaches to learning that are driven by a process of enquiry ’ (Hutchings, 2007).

What is Research-based Learning? |

Thinking Writing

Research-based teaching Research-based teaching means that students carry out research in their courses independently and with an open outcome. This helps to internalize and practice research conducts and methods, skills such as formulating a precise question and processing and monitoring a research process.

Teaching and Learning Research Summaries: A collection for ...

Constructivism is based on the premise that we construct learning new ideas based on our own prior knowledge and experiences.

Learning, therefore, is unique to the individual learner. Students adapt their models of understanding either by reflecting on prior theories or resolving misconceptions.

Evidence-based education is related to evidence-based teaching, evidence-based learning, and school effectiveness research. For example, research has shown that spaced repetition (also spaced training, spacing effect and spaced learning) "leads to more robust memory formation than does massed training, which involves short or no intervals".
