Becoming a TEACHER Learning And

Teaching Secondary Science

The attainment gap in science may not be as well-documented as the gap in English and maths, but it is just as pervasive. Our research has shown

Read Free Learning And Teaching Secondary

that disadvantaged pupils start to fall behind in science in Key Stage 1; the gap only gets wider throughout primary and secondary school and on to A-level. Helping schools to use evidence and to understand better the most effective ways to improve results is the best way to tackle this country's stark science attainment gap.

School 1. Develops problem-solving skills With the knowledge of science, you learn to think logically and solve a problem. It is this problem-solving skill, which is learnt in the early years that have enables a person to solve problems. Communications, medicine, transportation, and almost everything you see around you are mainly present because individuals have used their knowledge of science to create real life applications.
