Learning in the Museum examines major issues and shows how research in visitor studies and the philosophy of education can be applied to facilitate a meaningful educational experience in museums. Hein combines a brief history of education in public museums, with a rigorous examination of how the educational theories of Dewey, Piaget, Vygotsky and subsequent theorists relate to learning in the museum.

Involving ourselves with our rich and diverse heritage in enriching and transformational experiences provides distinctive opportunities for learning. Museum learning can transform our lives and should be accessible, relevant and enjoyable to everyone. The benefits of museum learning are now well-established through independent research. Such programmes have been shown to help social inclusion, deepen partnerships between schools and museums, and increase levels of pupil attainment.
