The test program runs lint on two files when two consecutive arguments are of the form namea.c and nameb.c. It then compares the output of lint with the file name.w. Lint is also tested by running it on existing programs. Lint has been run on some UNIX utility programs in /usr/src/cmd, on Unipress Emacs (consisting of more than 30,000 lines of code) and the program itself. Bugs have been found in e.g. /usr/src/cmd/cat.c and /usr/src/cmd/ld.c.
