?Linux Firewalls on Apple Books
While Linux can be made very secure, you can increase the security of your entire network with jump boxes. Special Thanks: This article was made possible by support from Linux Professional Institute A jump box is a system set up with multi-factor authentication (MFA) usually placed in a network DMZ with very restricted access to the corporate network and no returning Internet access for any protocol.

Jump Box Security » Linux Magazine
Usually books on advanced topics like Linux security is written in complicated technical language suitable for seasoned sysadmins. This book is slightly different. From a non-technical manager to seasoned DevOps/SecOps to CTO, this book is a fine read for every experience level. ... Linux Firewalls: Enhancing Security with nftables and Beyond ...
