The information in this section also applies to Windows 2000, which uses the NT loader. To accomplish this, you need to provide the NT loader with a copy of the Linux boot

sector. Here's how you do that on a computer running Windows NT with an NTFS filesystem (note that Windows NT should be installed on your system already).

As mentioned earlier, when you run Windows NT, its boot loader expects to be the one in charge; therefore, the standard way to dual-boot Windows NT and Linux is to add Linux as an option on the NT boot menu. This section describes

how to do that. The information provided here also applies to Windows 2000 and Windows XP, which use the NT loader.

Dual-booting between Windows NT, 2000 and XP and Linux. Install Fedora Core Linux. Boot from the Fedora Core CD or

DVD and install Linux in drive 1. See the installation tutorial for details in installing Linux, but be sure you install GRUB (the new Linux Loader) in the boot partition of the secondary IDE drive (hdb1), not in the master boot record (MBR) of the

first hard drive (where Windows is) -- this is very important.

into SCO Unices
(SCO was partially
owned by both
Microsoft and
Novell).
