Masters in Technology in VLSI Design and Embedded system is a 2-year full time postgraduate course, divided into 4 semesters of six months each., the eligibility for which is having bachelors degree in electronics and communication or other such equivalent degrees with minimum 50% marks in the aggregate of all semesters of the degree examinations (with a slightly lower cut off for SC/ST and OBCs).

M.Tech. (VLSI Design and Embedded System): Course Details ...

The VLSI and Embedded Systems M.Tech program will cover the fundamentals and engineering aspect of designing and developing IC based systems. Traditionally VLSI technology has emerged out as a successful conglomeration of two streams: material science and electrical engineering.

The M.Tech program in VLSI and Embedded Systems will cover the fundamentals and engineering aspects of designing and developing IC-based systems. Traditionally, VLSI technology has emerged out as a successful conglomeration of two streams: Material Science and Electrical Engineering. The state of the art VLSI technology requires research in physical devices as well as novel design and development of electrical circuits.

What are the scopes after doing an M.Tech in VLSI? - Quora

M.Tech. Embedded Systems is a four-semester Work Integrated Learning Programme designed for engineers working in the Embedded Systems industry (automotive, avionics, consumer electronics, medical devices, defence, and processor design) who want to gain knowledge in state-of-the-art tools and theories. The core topics span across Embedded control, Real-time systems, Model-based design and Verification, Processor Architecture, Chip Design and implementation of Embedded Systems.

About M.Tech VLSI & Embedded System design Both VLSI and Embedded System are high in demand. As long as electronics exist, circuits will exist and so will ICs, hence this field will continue growing at a great pace. VLSI and Embedded Design are two different concepts which comprise the design and development of IC based systems.

M.TECH. - (VLSI) In the post-graduation programme M.Tech VLSI, students are allowed to pursue the course from schools of Electronics Engineering, VITAP. The entry into these programmes occurs by successfully getting through the VITMEE examination conducted every year. The curricula of programmes have been designed to cater to the ever changing demands of VLSI industry and needs of the society through research.
