Students will use questions of their own creation or from the dichotomous key to identify the other teams skull. Questions can be asked in
Guess that Skull - Environmental Education Program
The most effective means of identifying a skull to species is with the use of a dichotomous key. A dichotomous key allows a person, through a series of questions, to identify an organism to species by process of elimination. Plants, fish and even skulls can be identified using this method. Below is an example of a dichotomous skull key. Excerpt taken from "A Key-Guide To Mammal Skulls And Lower Jaws" by Aryan I Roest. ??1. a.
Skull Science
Skull Key to Adult Land Mammals Although mammalian teeth exhibit similar components, the number, size, shape, and structure of teeth vary widely among mammals. Part of these differences corresponds to differences in diet. Number, size, shape, and structure of teeth also serve as valuable tools in the classification and identification of mammals.
Skull Key to Adult Land Mammals
