This commentary refers to '2020 ESC Guidelines for the management of acute coronary syndromes in patients presenting without persistent ST-

segment elevation 'by J.-P. Collet et al., doi: 10.1093/eurheartj/ehaa575.. We highly appreciate the discussion on the different recommendations of the 2020 European Society of Cardiology (ESC) Guidelines for the management of acute coronary syndromes ...

Management of acute coronary syndromes in patients ...

Management of acute coronary syndrome is targeted against the effects of reduced blood flow to the afflicted area of the heart muscle, usually because of a blood clot in one of the coronary arteries, the vessels that supply oxygenated blood to the myocardium. This is achieved with urgent hospitalization and medical therapy, including drugs that relieve chest pain and reduce the size of the

infarct, and drugs that inhibit clot formation; for a subset of patients invasive measures are also employe

These conditions are managed Page 6/15

similarly; the aims of management are to provide supportive care and pain relief during the acute attack and to prevent further cardiac events and death. For advice on the management of patients with acute ST-segment elevation myocardial infarction (STEMI), see below.

Acute coronary syndromes |
Treatment summary | BNF content ...
Patients with acute coronary
syndromes are at high risk of
myocardial infarction and death. 4
Optimal treatment of patients with ST
segment elevation myocardial
infarction is clearly defined. 5
However, the management of
patients with unstable angina and
non-Q wave myocardial infarction
remains controversial because of the
heterogeneous nature of these

conditions and recent advances in their treatment options.

Management of acute coronary syndromes | The BMJ |
About this book Acute Coronary Syndrome covers the spectrum of clinical conditions ranging from unstable angina to non-ST elevation myocardial infarction and ST elevation myocardial infarction.
These life-threatening disorders are a major cause of emergency medical care, hospitalization and mortality.

Syndromes | Wiley Online Books
Recently, data on a novel strategy of
dual antithrombotic therapy (DAT)
consisting of factor-Xa inhibition with
a very low dose of rivaroxaban (2.5
mg b.i.d.) plus aspirin has emerged,
Page 8/15

and such a regimen should be considered as a treatment option for maintenance treatment beyond 12 months post ACS PCI.

2020 ESC Guidelines for the management of acute coronary ...
This quality standard covers diagnosing and managing acute coronary syndromes in adults (aged 18 and over). Acute coronary syndromes are medical emergencies that include myocardial infarction (heart attack) and unstable angina (unexpected, severe chest pain). It describes high-quality care in priority areas for improvement.
