by someone else to give a proof. Hence, providing a solutions manual would negate a necessary aspect of the course. In addition, a solutions manual would be of very little help in verifying the correctness of a proof, since there are many different ways to prove almost any given statement, all equally correct.

Style Guide For Writing Mathematical Proofs Adapted by Lindsey Shorser from materials by Adrian Butscher and Charles Shepherd A solution to a math problem is an argument. Therefore, it should be phrased and structured in the same way as an argument, with the intent to convince the reader of a certain idea. This is similar to writing an essay, where
