Melodyne is integrated in Cakewalk via the ARA protocol (see ARA Audio Random Access). The Melodyne interface appears docked in Cakewalk's MultiDock view. After an audio clip has been converted to a Melodyne Region FX clip, you can make changes to the clip dynamically, just like any regular audio clip.

Melodyne Plugin Manual

If your DAW supports ARA, visit its user manual to learn how to integrate it with Melodyne. TIP: Place Melodyne as the first plug-in on an audio track. If you have effects such as delay or compression in front of it, Melodyne will also record that. Having a clean and dry signal will ensure you get the best results possible.

Celemony | What is Melodyne?
Melodyne's chord recognition technology is so advanced, it can consider tracks apart or together – even the entire mix – and identify the chords formed when their notes are combined. It analyses your recordings fast and reliably and fills in the Chord Track automatically. This makes working with chords even easier. In the video: Working with chords. Hands-on film about the new chord ...
