### Modern Biology Section 8 1 Review Answers

Modern biology is rooted in an understanding of the molecules within cells and of the interactions between cells that allow construction of multicellular organisms. The more we learn about the structure, function, and development of different organisms, the more we recognize that all life processes exhibit remarkable similarities. Molecular Cell Biology concentrates on the macromolecules and ...

SECTION. 8.1. IDENTIFYING DNA AS THE GENETIC MATERIAL.

Reinforcement. KEY CONCEPT. DNA was identified as the genetic material through a series of experiments. A series of experiments helped scientists recognize that DNA is the genetic material. One of the earliest was done by Frederick Griffith who was studying two forms of the bacterium that causes pneumonia.
