Guides difference between Users and Resources. When you create Resource in MS PROJECT PROFESSIONAL 2010, PROJECT SERVER 2010 creates User for that Resource. Resource is someone you need to do actual work on your Project (Projects). User can be someone who will use PROJECT SERVER 2010, but who will not work on tasks on projects. For example, you can have Administrator who will administrate your PROJECT SERVER 2010, but who will do no work on any Task on any Project.

Managing User Accounts in MS PROJECT SERVER 2010 | Nenad ...
Export data from Project Server 2010. To export data from Project Server 2010, use the .sql scripts and Microsoft PowerShell scripts as noted in the following table. For details

2010. Microsoft Project 2010 adds ribbons to its user interface. Ribbons are available in other Office products, such as Microsoft Project and PWA. Other features include Project Portfolio Server, the inclusion of a "Timeline" view, which graphically represents key tasks and milestones. Another view that helps with resource management is the Team Planner, which provides a graphical view of assignments of tasks to resources.
