Unlike a typewriter, MS Word can delete text on the screen and leave no trace—it is as if you never typed on the page in the first place. There are two different buttons on the keyboard that will allow you to erase text. They are the “Delete” key and the “Backspace” key (#s 1 and 2 on the keyboard map on page 7).

Edited by Abbas Vattoli. Word processing. Word processing software is used to create and maintain electronic documents. Alterations can easily be made to stored documents (instead of retyping them), and multiple copies can be printed. Professional looking results can be obtained by using different fonts, and by incorporating graphics in a document.
