Description The model 317 integrated amplifier uses an identical power amplifier circuit to the 214 power amplifier. The unit has 6 line inputs, including 2 tape in/outputs with dubbing facilities. By removing the links between the pre-out and main-in sockets the pre-amplifier section can be separated from the power amplifier for easy upgrades.

I've been using my NAD 317 integrated for over a year now and it has performed flawlessly. I must confess that I became alarmed after reading some of the negative reviews on this website, but I can only relate to my personal experience. The hum in the left channel, as indicated by other reviewers, is real. Actually, for my unit at least, "hum" is really too strong a word. I would call it a ...

Actually the 317 only is my second integrated, so my experience is somewhat limited. I bought the NAD to replace my Sony F519R, which is also rated at 80 W/ch. But it clearly couldn't handle my new Elipson speakers: the sound became distorted at louder volume levels, and with "source direct" switched off, the midrange tonal balance was altered ...
