NEMA connectors are power plugs and receptacles used for AC mains electricity in North America and other countries that use the standards set by the US National Electrical Manufacturers Association.NEMA wiring devices are made in current ratings from 15 to 60 amperes (A), with voltage ratings from 125 to 600 volts (V). Different combinations of contact blade widths, shapes, orientation, and ...

~~NEMA connector—Wikipedia~~

The Nema 1-15-P is normally referenced as a 2-prong plug that fits into a standard 110 VAC wall outlet. It has two flat blades, just like the NEMA 5-15 plug, but has no ground pin. The female mating outlet for the 1-15-P is called a 1-15-R (R for "receptacle"). Most current versions of this plug have one blade slightly wider than the other.
