AF-Area Mode. Explanation: The AF-area mode determines which of the 11 focus points are used. The following description is valid for taking pictures through the viewfinder, not in live view-mode. single point: The D5100 uses one manually selected focus point that is highlighted in red in the viewfinder. Dynamic-area AF: The D5100 uses one manually selected focus point initially but also the others around when your subject leaves the selected focus point temporarily.

In A mode you choose the Aperture, and the D5100 chooses the shutter speed. S Mode: Shutter Priority . In S mode you set the Shutter, and the D5100 sets the aperture. If the D5100 runs out of available apertures, you easily can get under or over exposure in S mode: watch that the D5100 can select a correct aperture for your lighting. M Mode: Manual Exposure . In Manual mode, you have to set everything the hard way.

Explanation: The focus mode determines if and how the D5100 tracks focus continuously for moving subjects. The following description of possible values is valid for taking pictures through the viewfinder, not in Live View mode. AF-A: The D5100 tries to recognize moving subjects and decides automatically if it switches to continuous tracking or not. AF-S („single auto focus“): The D5100 focuses only once when you press the shutter release button halfway and will then keep the focus until ...
