Everything installed in your Nissan 350Z needs to be kept in good working condition. The parts mostly involved are the crankshaft, pistons, camshafts, and valves. If your 350Z timing chain has been running for around 100,000 kilometers, it may be time to change it. Nissan timing chains for all engine types are available here at our website.

Timing Belt Or Timing Chain?

A timing chain runs inside the engine, as it needs to be lubricated by the engine oil. A timing belt typically needs to be replaced between 40,000 and 100,000 miles depending on the vehicle. It's a few hundred dollar repair. A timing chain doesn't need to be replaced unless there is a problem with it.
