Nrp Guidelines 2012 Meconium—bc-falcon.deity.ie
When Amniotic Fluid Is Meconium-stained The NRP Steering Committee no longer suggests routine endotracheal suction for non-vigorous, meconium-stained babies until additional research demonstrates a benefit to this practice. Manage the meconium-stained baby the same way as non-vigorous babies with clear amniotic fluid.

To Suction or Not to Suction
Out of the infants born through MSAF, 10% to 20% are nonvigorous and 3% to 5% develop meconium aspiration syndrome (MAS). 1, 2 Modern obstetric practices, such as the avoidance of postmaturity, may have for the most part contributed to the reduction in the incidence of MAS. 3, 4 Over the years, the Neonatal Resuscitation Program (NRP) has been recommending less aggressive interventions for newborns who are meconium stained after published evidence from large randomized controlled trials. 5 ...

Nrp Guidelines 2012 Meconium—piwik.epigami.sg
The American Heart Association (AHA) NRP suggestion regarding nonroutine tracheal intubation for suctioning of meconium in infants born through MSAF who are nonvigorous was published in October 2015. 5,6 The NRP recommended implementation of these guidelines on or before January 1, 2017. The process for adoption of the recommendations was different from past processes in that the AHA NRP did not require a definitive RCT to change the recommendation but instead concluded that there had been ...
