g-ideas-and-techniques.com

The key to mixing color is understanding the various aspects that make up any given shade: hue, chroma, and value. Put simply, the hue is what a layman might call the color itself; the

# Online Library Oil Painting Color Mixing Guide

chroma is the degree of saturation, and the value is the degree of lightness or darkness.

Mixing: Chart the Wheel &

*Page 27/49*

# Online Library Oil Painting Color Mixing Guide

## Mixing Guide

Mix the two colors on either side of the color you want to make that color. To make tints, you make pure versions of basic hues and then add white to them. You make shades by adding black

# Online Library Oil Painting Color Mixing Guide

or complementary hues to the pure hues. To those shade mixtures, you add white to make tones. As you add white, black, and complementary colors to your pure hues, you change their values and their intensities

# Online Library Oil Painting Color Mixing Guide

in very specific ways.  
Complementary hues are  
directly across from each  
other on the color wheel.

---

Oil Painting For Dummies  
Cheat Sheet - dummies

# Online Library Oil Painting Color Mixing Guide

Beginning with the base middle green paint, modify the hue and temperature with a yellow (to make a lighter, warmer, more yellow green) or blue (to make a darker, cooler, more bluish-green) paint. Second, modify the

# Online Library Oil Painting Color Mixing Guide

saturation with any warming or neutralising colour from orange to violet (it usually takes a very small amount to start dulling or desaturating the colour).
