Optimization Of Mud

EXECUTIVE SUMMARY Progress on the testing of fluid driven drilling hammers is on schedule.

Background On January 9th of 2001, details of the Mud Hammer Drilling Performance Testing Project were presented at a “kick off” meeting held in Morgantown.

Optimization of Mud Hammer Drilling Performance

Operators continue to look for ways to improve hard rock drilling performance through emerging technologies. A consortium of Department of Energy, operator and industry participants put together an effort to test and optimize mud driven fluid hammers as one emerging technology that has shown promise to increase penetration rates in hard rock.

Optimization of Mud Hammer Drilling Performance--A Program

...

The results will be used to improve the state of mud hammer drilling at depth and improve the understanding and ability to use mud hammers at deeper depths and at higher wellbore pressures. This knowledge is helping to redesign percussion drilling tools which have shown to drill much faster at shallower depths and lower wellbore pressures.
