This chapter describes phase two of the installation procedures for installing Oracle Database 12c Release 1 (12.1) with Oracle Real Application Clusters (Oracle RAC). Phase one is the completion of the Oracle Clusterware installation, as described in Oracle Grid Infrastructure Installation Guide. If a Windows Domain User is used as Oracle Home User, then both the user id and password should be specified during installation.

Oracle Database 12c

Oracle Real Application Clusters (RAC) allow customers to run a single Oracle Database across multiple servers in order to maximize availability and enable horizontal scalability, while accessing shared storage. User sessions connecting to Oracle RAC instances can failover and safely replay changes during outages, without any changes to end user applications, hiding the impact of the outages from end users.

Real Application Clusters Installation Guide - Oracle

Oracle Database 12c introduces Oracle Real Application Security (RAS), the next generation Oracle Virtual Private Database (VPD). Oracle RAS introduces the industry's most advanced technology for supporting application security requirements. Oracle RAS provides a declarative model that enables security policies that encompass not only the business objects being protected but also the principals (users and roles) that have permissions to operate on those business objects.

Separation of Duty for Administering Oracle Real Application Clusters. Starting with Oracle Database 12 c release 2 (12.2), Oracle Database provides support for separation of duty best practices when administering Oracle Real Application Clusters (Oracle RAC) by introducing the SYSRAC administrative privilege for the clusterware agent. This feature removes the need to use the powerful SYSDBA administrative privilege for Oracle RAC.

Changes in This Release for Oracle Real Application ...

Oracle Database 19c includes Oracle Real Application Security (RAS), the next generation Oracle Virtual Private Database (VPD). Oracle RAS is the industry's most advanced technology for supporting application security requirements. The out-of-the-box integration of Oracle RAS with Oracle Fusion Middleware and

If you've visited Oracle's websites in the last 12 years, you've seen the marketing byline: "Unbreakable." That tag line refers to the feature Real Application Clusters (RAC). Of course, a lot of elements are involved, but RAC has the spotlight. RAC is Oracle's database clustering solution.

Basics of Oracle 12c's Real Application Clusters - dummies

By Chris Ruel, Michael Wessler The Oracle 12c Database Replay feature evolved as a solution for the need to be able to do realistic application testing. Before Database Replay, if you wanted to test any kind of changes against performance or workload, you had to buy a third-party tool or do massive amounts of coding to fake a workload.
