Person Centered Care Getting Back To Basics

Despite a growing recognition of the need for more person-centredness in care – in governmental policy, the strategies of NHS organisations, and a growing practical evidence base – there remains a stubborn gap between the commitment to person-centred care and the reality on the ground. Perhaps we need to go back to basics? We summarise some of the key points from our new quick guide ...

A quick guide to person-centred care | The Health Foundation

Person-centred care. Person-centred care moves away from professionals deciding what is best for a patient or service user, and places the person at the centre, as an expert of their own experience. The person, and their family where appropriate, becomes an equal partner in the planning of their care and support, ensuring it needs their needs, goals, and outcomes.

Person Centered Care Getting Back To Basics

The Person-Centred Care Toolkit has been developed with NHS England to support GPs and primary care teams deliver person-centred care. People with multiple long-term conditions account for about 50% of all GP appointments but the current 10-minute GP consultation doesn't allow enough time to effectively address all health and well-being issues.

Person-Centred Care Toolkit - RCGP

Put simply, being person-centred is about focusing care on the needs of the person rather than the needs of the service. Most people who need health care these days aren’t happy just to sit back and let health care staff do what they think is best. They have their own views on what’s best for them and their own priorities in life.

What person-centred care means | First Steps | RCN

A person-centred care approach helps the patient to perform as many everyday activities by themselves as they can. This is important for encouraging the development of the patient’s skills and creating more confidence in the journey to recovery. Although in this approach the persons boundaries must be recognised and not pushed too far.

What is Person Centred Care? Principles, Definitions ...

Provide coordinated care, support, and treatment. To deliver consistent person-centred care, you have to coordinate with other health and social care workers and services. Otherwise, when patients move between services or carers, you have to rebuild an understanding of their personal wants and needs.
