Physical Biology of the Cell 2, Phillips, Rob, Kondev ...
We will focus on physical and mathematical model building by drawing examples from broad swaths of modern biology including cell biology (signaling and regulation, cell motility), physiology (metabolism, swimming and flight), developmental biology (patterning of body plans, how size and number of organelles and tissues are controlled), neuroscience (action potentials and ion channel gating, vision) and evolution (population genetics, biogeography).

Welcome to the Rob Phillips Physical Biology

Laboratory! Research in our group focuses on the development of quantitative, theoretical models to describe a broad range of biological phenomena. We then use these models to guide our experimental efforts, where we perform precision measurements to ...
