Metallurgy and Materials Welcome to Metallurgy and Materials. This discipline provides an understanding of how materials behave and how they can be used and improved; essential to the development of new products. We offer undergraduate courses in Materials Science and Engineering, Aerospace Engineering, Nuclear Engineering and Nuclear Science.

School of Metallurgy and Materials - University of Birmingham

Physical metallurgy is a field of study within metallurgy where the focus is on the physical properties and structure of metals and alloys. It is important to know the effect of for instance the chemical composition, heat treatment and production process on the final component in order to achieve components with optimal properties.
