Photosynthesis POGIL - Key

A POGIL activity is designed to be used with self-managed teams that employ the instructor as a facilitator of learning rather than as a source of information. A POGIL activity guides students through an exploration to construct, deepen, refine, and/or integrate understanding of relevant disciplinary content.

6 POGIL™ Activities for High School Chemistry 20. For each experiment in Model 2, determine the relationship between the independent and dependent variables, and write an algebraic expression for the relationship using variables that relate to those in the experiment (P internal, V, T or n). Use k as a proportionality constant in each equation.

Pogil Activities For High School Chemistry Worksheet Answers

A POGIL activity often takes more time than a lecture on the same content, but as teachers we should focus on outputs (what is learned), not inputs (what is covered). Topics usually contain several related concepts; students who truly understand one key concept often find it much easier to learn related concepts.
