Porsche 928 S4 Service Timing Belt Procedure porsche 928 s4 service timing Clearly the function of the timing-belt and its related components is absolutely critical. While Porsche specifies a service interval of 60,000 miles, most 928 specialists recommend a conservative 40-45,000 mile service. Due to its location the water pump should be replaced.

[DOC] Porsche 928 S4 Service Timing Belt Procedure

You'll find that most 928 owners like to service it at a more conservative 40,000-45,000 miles. Once again, how and where you drive may adjust these numbers. Unless you know what you're doing, because you have to remove a number of items to replace the timing belt, it might be a good idea to have it done professionally.

PORSCHE 928 FACTORY SERVICE MANUALS AND WIRING DIAGRAMS

The Porsche 928 GTS is a 2+2 coupe, front engined, liquid cooled, rear drive, with a steel monochoque body. The engine is an all-alloy V8, with a 90 degrees included angle between the two banks of cylinders: bore is 103.9 mm, stroke 87.9 mm giving a capacity of 5397 cm3 The compression ratio is 10.4:1, timing is done by two overhead camshafts (2 per bank) with 2 intake and 2 exhaust valves ...

Porsche 928 S4 GT GTS

Porsche® 928 Cam Timing Tool. Order Now. View Images. Application: 1985-1995 32v engines. This new tool allows you to advance/retard your camshaft timing, or simply dial it in to spec, accurately and quickly from the front of the camshafts without having to take the cam covers off! If you have ever replaced the timing belt on your 928, then you probably have learned what a challenge it can be to get both cams adjusted to the same timing spec.

Porsche® 928 Cam Timing Tool - from 928 Motorsports

Porsche 928 Cam-belt Tensioning Tool The J.Kempff 928 cambelt tension tool is suitable for all 16v and 32v Porsche 928 cars. It is similar to the factory "Special Tool 9131" as shown on Page 15-17 of the Workshop manual.
