Benninga, Principles of Finance with Excel 3e Student ... Principles of finance with Excel. Benninga, Simon. Finance is a topic that requires much computation, and in today's business world that computation is done almost entirely using Excel software. Despite this, existing finance textbooks continue to rely heavily on hand calculators. Business school students--whose background in Excel software is often weak when they come into finance courses--find that when they leave the academic environment they have to relearn both finance and the software.

Principles of finance with Excel | Benninga, Simon | download

Authors Simon Benninga and Tal Mofkadi show students how spreadsheets provide new and deeper insights into financial decision making. The third edition of Principles of Finance with Excel covers the same topics as standard financial textbooks--including portfolios, capital asset pricing models,

stock and bond valuation, capital structure and dividend policy, and option pricing. For each topic, the authors provide step-by-step instruction on how to use Excel functions to help with relevant ...
