Probability Middle School Study Guide

Theoretically, probability of an event A is the ratio of number of favorable events (n) to number of total possible events (N).

Probability of an event A can be expressed as: $P(A) = n/N$ Sam can either pass or fail.

The probability of an event occurring is written as a decimal or a fraction, so make sure you can work with both! To calculate the probability of an event, we need to know the number of successful outcomes (e.g. the number of red counters in a bag) and divide it by the total number of outcomes (e.g. the
