Bay control IED REC650 REC650 is designed for the control, monitoring and protection of circuit breakers, disconnectors, and earthing switches in any type of switchgear and different switchgear configurations. With versatile functionality, the REC650 can be applied to both single and multiple bay arrangements. 2. Application REC650 is used for the control, protection

Bay control REC650 Product Guide - ABB

REC650 is used for the control, protection and monitoring of different types of bays in power networks. The IED is especially suitable for applications in control systems with distributed control IEDs in all bays with high demands on reliability. It is intended mainly for sub-transmission stations.

Bay control REC650 ANSI Product Guide - ABB

REC650 is used for the control, protection

and monitoring of different types of bays in power networks. The IED is especially suitable for applications in control systems with distributed control IEDs in all bays with high demands on reliability.

Bay control REC650 ANSI Product Guide - ABB

REC650 is used for the control, protection and monitoring of different types of bays in power networks. The IED is especially suitable for applications in control systems with distributed control IEDs in all bays with high demands on reliability. It is suitable for the control of all apparatuses in the following switchgear arrangements:

RELION® Bay control REC650 Version 2.1 Product guide

REC650 is used for the control, protection and monitoring of different types of bays in power networks. The IED is especially suitable for applications in control systems with distributed control IEDs in all bays with high demands on reliability. It is suitable for the control of all apparatuses in single busbar single CB, double busbar single CB

Bay control REC650 Version 1.3 ANSI Product guide

Bay control REC650 1MRK 511 249-BEN - Product version: 1.1 Issued: February 2011 The function is characterized by great Insulation gas monitoring function flexibility and is

not dependent on the SSIMG operation of protection functions. It can record disturbances not detected by Insulation gas monitoring function (SSIMG) is protection functions.

Bay control REC650 IEDs belong to the Relion® protection and control product family. The Relion product family offers a wide range of products for the protection, control, measurement, and supervision of power systems. To ensure interoperable and future-proof solutions, Relion products have been designed to implement the core values of the IEC 61850 standard.
