2019 Qlik Sense June 2017 Release

For those of you who follow Qlik closely, you'll have noticed that the Qlik Sense June 2017 (or 17.06) Technical Preview has been released. This is the first in the new release naming convention and cadence – now five times per year. Alex Walker (Service Delivery Manager) shares his first impressions.

Qlik Sense June 2017 Release – First Impressions - Ometis

Proceed to install the Qlik Sense June 2017 Patch 2 release. Patch 2 includes the fixes from Patch 1, patches are cumulative. The

roll-back process is the same as above, follow the steps to remove the new patch and the installation is back to the initial release. Sometimes customers have a hard time finding where the patches are listed.

Qlik Sense June 2017 Release: How to remove a patch ...

Hi I have just loaded the Qlik Sense Desktop and was dissappointed to see I loaded Release 3.1 SR6 2016. 1) How can I get the 2017 June Release that is referred to on the site video.? I do a lot of stats type work and boxplots and histograms will be useful. 2) Where is an easy tutorial with exam...

June 2017 Release and R Extention - Qlik Community - 1336769

We recently installed the June 2017 release with patch 1. Patch 2 just came out. I wanted to upgrade our system. I was surprised to get a prompt that said patch 1 had to be uninstalled first. It does not work this way with the Desktop version and never worked this way with prior Enterprise vers...

Patches for June 2017 Release - Qlik Community - 1380654

When upgrading from earlier versions to June 2017 release or newer, there is an option to enable/disable a new logging service. By default it is enabled. After

Page 8/17

enabling logging service, logs will be stored in Repository Database. Afterwards, Operation Monitor will only show information after upgrade but not before.

Installation, Deployment and Management.

Solved: Cannot install June 2017 release - Qlik Community ...
In Qlik Sense, a Patch is a cumulative release that is installed on top of the major release. When upgrading from one major release to another (Ex: Qlik Sense June 2017 -> Qlik Sense November 2017) or if installing a more recent Patch (Ex: Qlik Sense June 2017 Patch 1 -> Qlik Sense June 2017 Patch 3), the already installed patch needs to be removed which is typically an automatic process.

Qlik Sense June 2017 and
later - Unable to
Upgrade/Patch ...
Since each release will be
similar in scope, we are
also replacing our number-
based naming convention with
releases identified by the
month and year they were
distributed. This means th
at instead of Qlik Sense ®
4.0, the June release will
simply be called Qlik Sense
® June 2017. (Most other
Qlik products will also
follow a similar cadence
going forward as well.) With
releases five times per
year, it might be difficult
to stay up to date on what's
new.

Qlik Sense® will release 5 times a year! - Qlik Community ...

Qlik Sense Update – Conclusion. The Cognitive

Engine has advanced a lot since April 2018, alongside the other 12 changes it's a great time to be a Qlik partner/customer. Since Qlik moved to five releases a year, in June 2017, they've built some serious momentum and I only hope it doesn't stop any time soon.
