## ~~Guides ? QlikView~~

The QlikView server in the front end manages the client server communication between the user and QlikView backend system. Back End. The QlikView backend consists of QlikView desktop and QlikView publisher. The QlikView desktop is a wizard-driven Windows environment, which has the features to load and transform data from its source. Its drag and drop feature is used to create the GUI layout of the reports that becomes visible in the frontend.
