The Latest in Clean Energy News | Renewable Energy World

Energy trends focuses on the supply and demand of coal, oil, gas, electricity and renewables in the United Kingdom. Data is published a quarter in arrears.

Energy trends - GOV.UK

Clean energy progress in recent years has primarily been a story of greater implementation of solar, wind, and energy storage. Those technologies will continue to improve in efficiency and performance and to decline in cost. They still have tremendous potential to be used much more widely to improve the nation's electricity supply.

Recent trends in state progress on clean energy ...

While they welcomed the declaration of the Department of Energy (DOE), Greenpeace campaigner Khevin Yu said “this is only a small step.” “To ensure the country's rapid transition to renewable energy, the DOE must take this further by enacting a permanent moratorium that includes not just coal but also gas projects in the pipeline, and jumpstart a phase out plan for existing coal and ...
